

tesseract\_examples  
/include/tesseract\_examples  
/online\_planning\_example.h

```
graph BT; A["tesseract_examples  
/src/online_planning_example.cpp"] --> C["tesseract_examples  
/include/tesseract_examples  
/online_planning_example.h"]; B["tesseract_examples  
/src/online_planning_example_node.cpp"] --> C;
```

The diagram illustrates the relationship between three files in the tesseract\_examples directory. At the top is a header file, 'online\_planning\_example.h', located in the 'include/tesseract\_examples' subdirectory. Below it are two source files: 'online\_planning\_example.cpp' in the 'src' subdirectory and 'online\_planning\_example\_node.cpp' in the 'src' subdirectory. Both source files have blue arrows pointing to the header file, indicating that they include it.

tesseract\_examples  
/src/online\_planning  
\_example.cpp

tesseract\_examples  
/src/online\_planning  
\_example\_node.cpp
