

tesseract_planning
::TaskGenerator

```
graph BT; A[tesseract_planning::CheckInputTaskGenerator] --> B[tesseract_planning::TaskGenerator];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a gray box representing the base class, `tesseract_planning::CheckInputTaskGenerator`. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, `tesseract_planning::TaskGenerator`. This indicates that `CheckInputTaskGenerator` inherits from `TaskGenerator`.
