

tesseract\_examples  
/include/tesseract\_examples  
/online\_planning\_example.h

```
graph BT; A["tesseract_examples  
/src/online_planning_example.cpp"] --> C["tesseract_examples  
/include/tesseract_examples  
/online_planning_example.h"]; B["tesseract_examples  
/src/online_planning_example_node.cpp"] --> C;
```

This diagram illustrates the relationship between source files and a header file in a project. At the top is a gray box representing the header file: `tesseract_examples/include/tesseract_examples/online_planning_example.h`. Below it are two white boxes representing source files. The left box is `tesseract_examples/src/online_planning_example.cpp` and the right box is `tesseract_examples/src/online_planning_example_node.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

tesseract\_examples  
/src/online\_planning  
\_example.cpp

tesseract\_examples  
/src/online\_planning  
\_example\_node.cpp
