

tesseract\_examples  
/include/tesseract\_examples  
/glass\_upright\_ompl\_example.h

```
graph BT; A["tesseract_examples  
/src/glass_upright_ompl_example.cpp"] --> B["tesseract_examples  
/include/tesseract_examples  
/glass_upright_ompl_example.h"]; C["tesseract_examples  
/src/glass_upright_ompl_example_node.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `tesseract_examples/include/tesseract_examples/glass_upright_ompl_example.h`. Below it are two white boxes representing source files. The left box is `tesseract_examples/src/glass_upright_ompl_example.cpp` and the right box is `tesseract_examples/src/glass_upright_ompl_example_node.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

tesseract\_examples  
/src/glass\_upright\_ompl  
\_example.cpp

tesseract\_examples  
/src/glass\_upright\_ompl  
\_example\_node.cpp
