

tesseract_examples
/include/tesseract_examples
/freespace_hybrid_example.h

```
graph BT; A["tesseract_examples  
/src/freespace_hybrid_example.cpp"] --> C["tesseract_examples  
/include/tesseract_examples  
/freespace_hybrid_example.h"]; B["tesseract_examples  
/src/freespace_hybrid_example_node.cpp"] --> C;
```

This diagram illustrates the relationship between two source files and a common header file. At the top, a gray-shaded box represents the header file: `tesseract_examples/include/tesseract_examples/freespace_hybrid_example.h`. Below it, two white boxes represent source files. The left box is `tesseract_examples/src/freespace_hybrid_example.cpp` and the right box is `tesseract_examples/src/freespace_hybrid_example_node.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
