

tesseract_motion_planners
/ompl/include/tesseract
_motion_planners/ompl/serialize.h

```
graph BT; A["tesseract_motion_planners /ompl/src/serialize.cpp"] --> C["tesseract_motion_planners /ompl/include/tesseract _motion_planners/ompl/serialize.h"]; B["tesseract_motion_planners /test/serialize_test.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `tesseract_motion_planners /ompl/include/tesseract _motion_planners/ompl/serialize.h`. Below it are two white boxes representing source files. The left box is `tesseract_motion_planners /ompl/src/serialize.cpp` and the right box is `tesseract_motion_planners /test/serialize_test.cpp`. Two blue arrows point from the source files up to the header file, indicating that both source files include the header.

tesseract_motion_planners
/ompl/src/serialize.cpp

tesseract_motion_planners
/test/serialize_test.cpp
