

tesseract\_planning  
::TaskInfo

```
graph BT; A[tesseract_planning::FixStateBoundsTaskInfo] --> B[tesseract_planning::TaskInfo];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `tesseract_planning::FixStateBoundsTaskInfo`. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, `tesseract_planning::TaskInfo`. This indicates that `FixStateBoundsTaskInfo` inherits from `TaskInfo`.
