

tesseract_examples
/include/tesseract_examples
/freespace_hybrid_example.h

```
graph BT; A["tesseract_examples  
/src/freespace_hybrid_example.cpp"] --> C["tesseract_examples  
/include/tesseract_examples  
/freespace_hybrid_example.h"]; B["tesseract_examples  
/src/freespace_hybrid_example_node.cpp"] --> C;
```

A diagram illustrating the relationship between source files and a header file. At the top is a gray box containing the header file path: `tesseract_examples/include/tesseract_examples/freespace_hybrid_example.h`. Below it are two white boxes. The left box contains the source file path: `tesseract_examples/src/freespace_hybrid_example.cpp`. The right box contains the source file path: `tesseract_examples/src/freespace_hybrid_example_node.cpp`. Two blue arrows point from the bottom of each source file box to the bottom of the header file box, indicating that both source files include the header file.
