

tesseract_examples
/include/tesseract_examples
/online_planning_example.h

```
graph BT; A["tesseract_examples  
/src/online_planning_example.cpp"] --> B["tesseract_examples  
/include/tesseract_examples  
/online_planning_example.h"]; C["tesseract_examples  
/src/online_planning_example_node.cpp"] --> B;
```

The diagram illustrates the relationship between three files in a project. At the top is a header file, 'tesseract_examples/include/tesseract_examples/online_planning_example.h', which is shaded gray. Below it are two source files: 'tesseract_examples/src/online_planning_example.cpp' on the left and 'tesseract_examples/src/online_planning_example_node.cpp' on the right. Both source files have blue arrows pointing upwards to the header file, indicating that they include it.

tesseract_examples
/src/online_planning
_example.cpp

tesseract_examples
/src/online_planning
_example_node.cpp
