

tesseract_examples
/include/tesseract_examples
/online_planning_example.h

```
graph BT; A["tesseract_examples  
/src/online_planning_example.cpp"] --> C["tesseract_examples  
/include/tesseract_examples  
/online_planning_example.h"]; B["tesseract_examples  
/src/online_planning_example_node.cpp"] --> C;
```

The diagram illustrates the relationship between three files in the tesseract_examples directory. At the top is a header file, 'online_planning_example.h', located in the 'include/tesseract_examples' subdirectory. Below it are two source files: 'online_planning_example.cpp' in the 'src/' subdirectory and 'online_planning_example_node.cpp' in the 'src/' subdirectory. Both source files have blue arrows pointing to the header file, indicating that they include it.
