

tesseract\_motion\_planners  
/descartes/include/tesseract  
\_motion\_planners/descartes  
/deserialize.h

```
graph BT; A["tesseract_motion_planners  
/descartes/src/deserialize.cpp"] --> C["tesseract_motion_planners  
/descartes/include/tesseract  
_motion_planners/descartes  
/deserialize.h"]; B["tesseract_motion_planners  
/test/serialize_test.cpp"] --> C;
```

This diagram illustrates the relationship between source files and a header file in a C++ project. Two source files, 'deserialize.cpp' and 'serialize\_test.cpp', are shown at the bottom, both with arrows pointing to a header file 'deserialize.h' at the top. The header file box is shaded gray, while the source file boxes are white.
